The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-87, 102-107, 121-169 and 174 are rejected under 35 U.S.C. 102(a) as being anticipated by Piron (U.S. Patent 6,419,073).

Piron shows in Figure 1 a divert guide path 22 having a radius that fully anticipates being at least among the claimed ranges.

Claims 88-101, 108-120 and 170-173 are rejected under 35 U.S.C. 102(b) as being anticipated by Leemkull (U.S. Patent 5,191,959).

Leemkull discloses a diverter conveyor that runs at speeds in the range of 450-650 feet per minute.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shearer, Jr. et al (U.S. Patent 6,513,642) and Snedecor (U.S. Patent 6,390,274) each show divert guide rails that appear anticipatory of the widely claimed radius ranges. Cotter et al. (U.S. Patent 5,127,510) discloses a divert conveyor that runs at the claimed speeds.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James R. Bidwell whose telephone number is (571)272-6910.
